EDUCATION

University Technical Degree in Web Development | UNER Jan. 2026 - Dec. 2028

Bachelor's Degree in Information Systems | UNAM Jan. 2022 - Present

r/Argentina-programa Jan. 2022 - Dec. 2022

Flutter Tutorial from Beginner to Expert Level Mar. 2025

SKILLS

Backend

- Python
- FastAPI
- C#
- .NET Framework
- REST APIs
- SQLAlchemy
- JWT Authentication
- WebSockets

Frontend

- Flutter
- Dart
- JavaScript
- TypeScript
- HTML

Data & Analytics

- Pandas
- Matplotlib
- Seaborn
- Folium

Databases

- PostgreSQL
- Microsoft SQL Server
- SQL
- Database Design
- ETL Pipelines
- Alembic Migrations

DevOps &

Infrastructure

- Docker
- Docker Compose
- Redis
- Linux
- Git
- GitHub
- Firebase

Esteban Rodriguez

Full Stack Developer |
Backend Specialist

Backend and Full-Stack Developer specialized in SaaS platforms, backend architectures and cloud-ready business systems. Experienced in building scalable APIs, automation platforms, administrative dashboards and enterprise applications using Python, FastAPI, C#, .NET, Flutter and PostgreSQL. Strong background in database architecture, authentication systems, payment integrations, Dockerized environments and realtime business workflows. Focused on designing modern software solutions that improve operational efficiency, automate processes and scale reliably in production environments.

WORK EXPERIENCE

FULL STACK DEVELOPER

January 2025 - Present

Pecu Labs | Freelance / Remote

Design and development of scalable SaaS platforms, backend systems and cloud-ready business applications.

Responsibilities:

- Developed REST APIs using FastAPI and Python
- Designed PostgreSQL database architectures and business workflows
- Built Flutter Web applications and administrative dashboards
- Implemented authentication systems and payment integrations
- Integrated Redis caching and realtime communication features
- Containerized services using Docker and Docker Compose
- Developed automation workflows and operational management systems

Technologies: Python, FastAPI, Flutter, PostgreSQL, Redis, Docker, Firebase, Git

.NET Backend Developer

June 2024 - November 2024

J&E Codex | Temporary contract / Remote

Contributed to the development of a scalable inventory and business management platform used by multiple small businesses and retail operations.

Responsibilities:

- Developed inventory management and reporting modules using C# and .NET
- Optimized SQL Server database structures and queries
- Implemented barcode-based stock management features
- Customized business workflows based on client requirements
- Improved platform scalability and operational efficiency

Technologies: C#, .NET Framework, SQL Server, Git
